

REMARKS

Claims 1- 3, 6-8, 10-12, and 15-18 are now pending in the above-referenced application.

Applicants have incorporated into claim 1 the subject matter of now canceled claims 1, 5, 9, 13 and 14. Applicants submit that no motivation among the references in the rejection exists that would induce someone skilled in the art to carry out such a combination.

Such a vehicle electrical system has the advantage that monitoring and controlling of the generator available in the vehicle electrical system is possible as well with the aid of the electronics system (according to the subject matter of claim 13). The references relied on by the Examiner do not address this problem.

It is therefore respectfully requested that the objections and rejections be withdrawn, and that the present application issue as early as possible.

Respectfully submitted,

KENYON & KENYON LLP
